

The perfect hybrid solution

16 Channel Network Video Encoder Rack & 4 Channel Blades

SPE-1600R/400B

The SPE-1600R is a 16 channel rack capable of housing up to 4 x SPE-400B ONVIF compliant blade network video encoders to deliver a fully scalable solution which enables users to place analogue cameras onto their IP network. This allows users to benefit from utilising existing analogue cameras across their system whilst benefitting from the advantages that an IP network brings, such as increased flexibility and infrastructure cost savings. SPE-400B blade network video encoders can be added one-by-one to the SPE-1600R and provides real-time 4-CIF image transmission. Multi-streaming is provided giving the user a host of viewing and recording options whilst multiple codec operation (H.264, MPEG-4, MJPEG) puts the user firmly in control of how images are transmitted.

- Max. 30(25)fps at 4CIF resolution
- H.264, MPEG-4, MJPEG multiple codec
- Multiple streaming simultaneously
- 1000BASE-T
- SPE-1600R : extension rack, 4 slots for SPE-400B
