

## **VARIO** Power Supply Units

The VARIO series of Power Supply Units (PSU) is purpose designed to correctly power all VARIO illuminators including VARIO IP, and provides a platform for the easiest, quickest and safest wiring and installation.

As a full product family, there is a PSU to power any VARIO illuminator. The VARIO PSU requires a 100-230V AC input and provides 24V output. 20W, 50W and 100W PSU options are available.

With multiple outputs, installers have the ability to power multiple VARIO illuminators from a single PSU (medium and large size PSU only). The VARIO PSU also provides CAT5 connectivity for VARIO IP network illuminators (medium and large size PSU only).

Each PSU features a 'Fast-Connect' wiring terminal for quick and easy wiring of all VARIO input and output connections, including telemetry input and photocell following output. White-Light LED status indicators are also provided on all fused outputs to indicate the correct voltage and to provide support illumination during wiring.

The VARIO PSU has a high quality IP66 aluminium enclosure making it suitable for all environmental conditions. It also features convenient automotive blade output fuses allowing for fast and easy sourcing and replacement if required. The Slowblow input fuse can also be easily replaced without disconnecting the mains input, for easier and safer installation and maintenance. The VARIO PSU series is suitable for all VARIO low voltage lighting installations.

### **Features**

### Powerful

- Powers all VARIO illuminators including VARIO IP
- Powers multiple VARIO illuminators from one PSU

### Flexible

- CAT5 connection for VARIO IP (medium and large size PSU only)
- 'Fast-Connect' easy wiring for all VARIO input and output connections
- Internal illumination for night time installation

### Reliable

- High Quality IP66 Aluminium Enclosure
- Automotive blade output fuses fast and easy sourcing and replacement

#### Controlled

- Provides correct power for all VARIO illuminators
- Slowblow input fuse replaceable without disconnecting mains input
- Status indicators signify correct voltage

VAR-PSU-1x2 (small)

VAR-PSU-2x4 (medium)

VAR-PSU-2x8 (large)

# VARIO PSU Diagram

Features	Benefits	
Purpose designed PSU for VARIO illuminators	Provides correct power and provides easy wiring and installation	
A full family of VARIO PSU's	Can power any VARIO illuminator	
Multiple outputs (available in medium and large model)	Ability to run multiple VARIO units from a single PSU	
Cat 5 connector (available in medium and large model)	Easy CAT5 connection for VARIO IP illuminators	
'Fast-Connect' Wiring	Robust terminal for fast and easy wiring of all input/output connections	
White-Light LED status indicators	To identify correct output voltage and provide support illumination during installation and maintenance	
High quality IP66 aluminium enclosure	Suitable for all environmental conditions	
Automotive blade output fuses	Fast, easy sourcing and replacement	
Slowblow input fuse	Can be replaced without disconnecting mains for easier and safer installation and maintenances.

# **Technical Specifications**

	VAR-PSU-1x2 (small)	VAR-PSU-2x4 (medium)	VAR-PSU-2x8 (large)
Illuminators (standard)	1x VARIO 2 series plus aux output (max 8W)	2 x VARIO 4 series	2 x VARIO 8 series
Other Illuminator options		4 x VARIO 2 series*	4 x VARIO 4 series* 8 x VARIO 2 series*

\*Please note: for medium and large PSUs powering an increased number of VARIO illuminators, the total power of the illuminators must be equivalent to the PSU max output - illuminator output cables may also need to be commoned together to suit the number of available glands.

Mixed model sizes of VARIO illuminators can be powered from the same PSU e.g. VAR-PSU-2x4 can also run 2 x VARIO 2 series and 1 x VARIO 4 series
