

# PROMISE Vess™ A2000 Series

# Storage Solutions Designed for Surveillance

Vess A2200 & A2600 NVR Storage Appliances

#### **Features**

software

industries

**Optimized for Surveillance**NVR storage appliance optimized for IP video surveillance

Extensive VMS Support Certified/tested with the world's leading video management

Midsize to Large-Scale Solutions Ideal for up to over a hundred full-HD IP cameras making it perfect for banking, retail, gaming, manufacturing, and many more

#### **Cost Effective & Scalable**

Integrated solution results in less management overhead, plus it's easy & affordable to add capacity with the Vess R2000 external storage series

Easy to Administer & Maintain

Hot swappable drive bays, redundant power supplies, & One Plug Auto Service ensure Vess is incredibly easy to administer & maintain

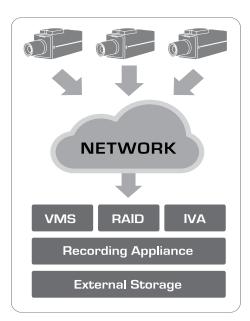

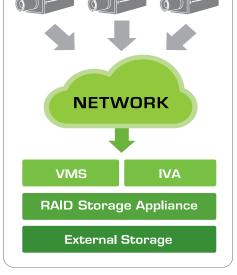

## **Engineered for Video Surveillance**

The Vess A2000 Series NVR storage appliance is engineered specifically to be the best solution for midsize to large-scale IP video surveillance deployments. Featuring failsafe protection that provides continuous recording without dropping frames under live playback conditions, it is ideal for 32 to over a hundred full-HD IP cameras, making it perfect for banking, retail, gaming, manufacturing, and many more industries.

#### **Reduces Deployment Costs and Complexity**

The Vess A2000 Series reduces support and equipment costs because there is no separate RAID storage unit to manage, eliminating the need for a server, controller cards, external cables, and a separate storage enclosure. Additionally, the Vess A2000 Series reduces interoperability conflicts caused when integrating different hardware.

Generic Practice

**PROMISE Proposal** 

# **Integrated Solution - Easier to Manage & Grow**

The Vess A2000 Series integrates the recorder and storage in a single solution making it significantly easier to scale as your business grows. Security practitioners can easily scale with no user configuration, just plug and add. When external storage is a must, easily scale up with PROMISE's Vess storage series, creating a total video surveillance solution that combines a recording appliance and external storage.

## **Support for Security Partners**

PROMISE has certified and validated the Vess A2000 appliance with the top solutions in the industry, including applications from AxxonSoft, Genetec, ONSSI, SeeTec, Milestone Systems, and more, offering customers more flexibility when building surveillance deployments. Plus, the Vess A2000 Series now supports the Milestone XProtect plug-in which allows users to manage the Vess A2000 series via the user interface of XProtect, making it significantly more convenient for users to manage their storage.

#### **Surveillance Solution Planner**

PROMISE Surveillance Project Design Tool 2.0 takes video surveillance solution planning into next level. Planner 2.0 provides recommendations for deployments and overall topology based on requirements input by the user. The full report indicates a specific number of cameras, bandwidth and storage capacity for each deployment. In addition, three widely used surveillance software platforms, Milestone, Axxonsoft and SeeTec, are available for inclusion in the plan. Users can select a preferred VMS or use it to compare planner outcomes with alternative VMS options.
