Applications

1 When installing an additional camera to your existing IP system – Comparison of typical method & SC-IPH1202E

When using SeeEyes SC-IPH1202E

**Only this section required newly
No need of power lines
No need of new cabling to NVR side**

Typical Method

2 Actual field when adding a new camera to your existing IP system
 – Comparison of typical method & SC-IPH1202E

When using SeeEyes SC-IPH1202E

Great 👍

- ✓ No need of new cabling
 - ✓ No need to damage facilities
 - ✓ No need of new power lines
 - ✓ No need of new Hub
 - ✓ Reduce construction period & cost
- (about 40% COST EFFECTIVE)

Typical Method

New cabling all the way from NVR side is required

Stupid 😞

- ✓ Damage facilities
- ✓ New power lines and cabling is required
- ✓ Additional devices such as extender, hub, junction box, etc. are required
- ✓ Longer and more difficult construction = High \$\$\$\$

When using SeeEyes SC-IPH1202E

Newly Installed Emergency phone

Existing IP(PoE) camera
