

FWL-01B

Electric Height Adjustable Floor Supported Wall Lift for Touch Displays Up To 86", 120kg

The floor supported wall lift offers double columns with extra stability and robustness for working with a touch display. The display can easily be adjusted in height silently & electrically with the remote control. At the backside of the mounting utility, space is reserved for placing a mini PC or thin client.

The stand offers an extra bracket with a VESA of maximum 800 x 600. Product is well accessible with the accessories of the floor supported wall lifts (for example five surface solution, soundbar bracket or a compact locking lid can easily be utilized).
