

DS-2TD2167-15/PI Thermal Network Bullet Camera

DeepinView

Hikvision DS-2TD2167-15/PI Thermal Network Bullet Camera equipped with built-in GPU which supports intelligent behavior analysis algorithm, can realize high-precision VCA detection and real-time alarm. It is applied to perimeter defense and fire-prevention in critical infrastructures such as solar park, substation, airport, recycling site, and warehouse. The pre-alarm system helps you discover unexpected events immediately and protects your property.

DRI Range Table

* The table is only for reference and the performance may vary according to different environment.

* The optimal human detection, recognition, and identification distances are calculated according to Johnson's Criteria. Detection Range: In order to distinguish an object from the background, the object must be covered by 1.5 or more pixels.

Recognition Range: In order to classify the object (animal, human, vehicle, etc.), the object must be covered by 6 or more pixels.

Identification Range: In order to identify the object and describe it in details, the object must be covered by 12 or more pixels.

Detection Range	Detection Range	Recognition	Recognition	Identification	Identification
