

DVD-R Printable Professional

DVD-R 8x Printable.

Highly compatible with **Inkjet, Thermal and Thermal Re-Transfer printers.**

DVD-R 8x Printable Professional can provide high matching with inkjet, thermal and thermal re-transfer printers to meet various requirements of high accuracy photos, colorful illustration and sharp text on the printable surface, with high speed recording and high capacity for video and data recording.

Optimum Disc Surface for each Printing Technology

White disc surface including very optimum substance for each printing technology, provides photo-realistic color, bright graphics and sharp text with the following advanced features.

- Inkjet printable disc offers superior fast drying to prevent ink from transcribing.
- Thermal printable disc realizes no drying or curing time.
- Thermal re-transfer disc makes dry and durable images printed with re-transfer ribbon inside the printer.

Large Print Capacity on Inkjet and Thermal Re-transfer Discs

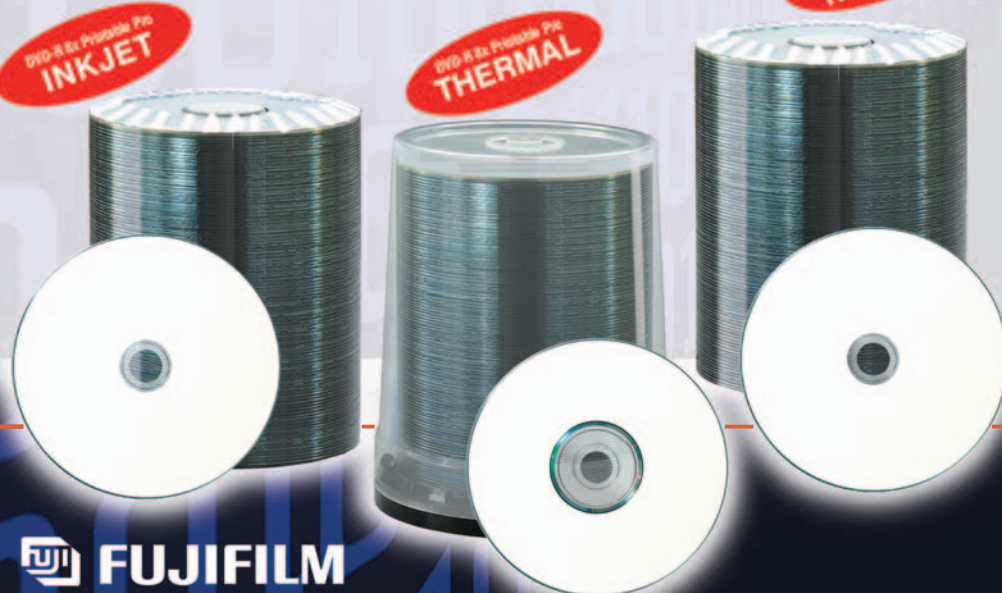

Both inkjet and thermal re-transfer discs allow to be printed even on the hub, offering extensible design.

Long Term Archiving

The disc has extremely long working life for video, image data or any type of information that can be stored digitally by adoption of the stable organic dye to protect against any climates. It is expected to give you 30 - 50 years archiving capability under room temperature condition.
